

## Grant Ideas from the Council

The general consensus seemed to really focus around education/support for the providers.

- ✚ - Continued support after the support (REWARDS/TEACH) that is already in place ends
- ✚ -training support (as provider is completing the training)
- ✚ -following up after training is complete
- ✚ -asking what they feel is missing (from training)
- ✚ -training for practical experiences not just paper training/ support in actual practices (on the job training)
- ✚ -**SPECIAL EDUCATION TRAINING**-seemed to be on a few peoples minds
- ✚ -Public and private sector continue to join forces
- ✚ -retaining the knowledge (knowing about TEACH/REWARDS)

Improve quality of workforce/workforce development- which seems to correlate with support for the providers.

- ✚ -more money toward the REWARD program
- ✚ -**PARENT ENGAGEMENT**
  - -parents can build on what the provider has already established
- ✚ -more outreach to the providers
  - -more understanding of their needs
  - -more dialog between providers of what is not working
  - -resolve the issues that aren't working
  - -more face to face time with the providers after training (less webinars)

Healthy lifestyle of our children (small part was mentioned)

- ✚ -Obesity prevention
- ✚ -General health and wellness

One Group broke it down:

30% improve quality of work force (B1. B2. B4)

30% increased family engagement (B1. B2)

25% more resources for data systems

- -program management
- -policy development

10% Training and assessments (B3)

5% Evaluation-higher quality of care in correlation with child abuse and neglect
